

## CALIBRATION AND TESTING

We have six test rigs and offer world class aftersales, care and calibration.

Straightpoint endeavour to calibrate, certify and despatch equipment to any location worldwide, within two working days of receipt.

*Straightpoint also calibrate and certify most other manufacturer's products - please contact our service department for more information.*

All test machines are Class I and tested by NPL, detailed below:

- 1) 250kg dead weight machine
- 2) 5t hydraulic tensile machine
- 3) 5t hydraulic compressive machine
- 4) 20t hydraulic compressive machine
- 5) 50t hydraulic tensile machine
- 6) 350t hydraulic universal test machine

In addition, we have a range of certified dead weights and loadcells for testing.

Recalibration Range	0-5,000kg	5,001 - 12,000kg	12,001 - 30,000kg	30,001 - 50,000kg	50,001 - 150,000kg	150,001 - 350,000kg
---------------------	-----------	------------------	-------------------	-------------------	--------------------	---------------------

Please note: Return carriage at cost is added to these service costs.  
Witnessed testing POA.

We can also proof test units at the time of calibration to twice SWL.

Proof Test Range	0-5,000kg	5,001 - 12,000kg	12,001 - 30,000kg	30,001 - 50,000kg	50,001 - 350,000kg
------------------	-----------	------------------	-------------------	-------------------	--------------------

Please send loadcells for calibration to:
